FAO: All customers using skips

Dear Customer,

In recent years we have been hit with rising costs and limitations with regards to the waste (such as plasterboard etc) and new legislations coming into play mean that we are now facing further limitations regarding furniture appliances, mixed waste and wood waste being brought in via skips and other tipper vehicles.

Off the back of this we have spent multiple hours discussing amongst ourselves in order to try to find a resolution to this matter that will allow us to continue to serve our customers with the type of service that we pride ourselves on here at EGAP. Ultimately, we have decided from a business standpoint that it is no longer feasible for us to continue with skips.

We have made the decision with immediate effect. EGAP Recycling will no longer be delivering any new bins out and will only be doing exchanges if needed up until the 17th November on the understand we will be collecting and off hiring all bins (regardless if full) by the 22nd December.

It is with a heavy heart we have had to come to this decision and would like to apologise to all of our customers that this affects, however this will in turn mean that we will be pushing our grab and tipper service and aim to be the leaders in the market as we will have more time to produce our own better-quality products for new and existing customers.

Thank you for your custom.

Yours sincerely,

Steven Page and the EGAP Recycling team.
